Re: Risk Assessment Cost Savings at Former City Garage, 75 North Union Street, Akron, Ohio

Dear Mr. Schultz:

We have just received site closure (NFA) for our above referenced project. A cost savings exceeding 70% was obtained by using BJAAM's risk assessment technology, as opposed to intrusive remediation proposed by one of your competitors. In addition to cost savings, the project was completed in a fraction of the time of a traditional clean up. We look forward to working with you on future projects. Feel free to use this project and me as a reference. Again, thanks for your help in getting this project to completion in such a timely fashion.

Sincerely,

Stephen A. Dubetz, P.E., P.S., Manager
Engineering Services Division
