RE: BP #4052
8501 Mayfield Road
Chesterland, Ohio

Dear Troy:

I want to take this opportunity to thank you, Jeff Myers, and the rest of your organization for the outstanding work recently completed at the above referenced site. The work, which included a Groundwater Flow and Transport Model report, a Natural Attenuation supporting document, and a Tier II Evaluation report, were critical in assessing BP's true environmental liability to the area. Without these documents it would have been difficult for BP, the Ohio EPA, and the Bureau of Underground Storage Tank Regulations to have truly understood the extent of the dissolved hydrocarbons at this site and the surrounding area. BJAAM's modeling expertise and credibility were crucial to communicating the methodologies and conclusions of this work to the OEPA and BUSTR. I feel confident these efforts will result in BP receiving termination of the Final Findings and Orders with the OEPA and a no-further-action status from BUSTR.

I sincerely hope, that should the need arise on another project; we may be able to work together again. If there is anything I can do for you, please contact me at (216) 271-8931.

Sincerely,

Jim Schaeffer
Environmental Business Manager
